Programs

A) Write a PHP program to swap two numbers that are given at run time.

```php
<html>

<body>

<?php

echo "number before swapping is :<br>";

$a=45;

$b=78;

echo "a= $a<br>";

echo "b=$b<br>";

echo "the number after swapping is :<br>";

$a=$a+$b;

$b=$a-$b;

$a=$a-$b;

echo "a=$a<br>";

echo "b=$b";

?>
```

```
</body>

</html>
```

Output

number before swapping is :
a= 45
b=78
the number after swapping is :
a=78
b=45

B) Write a JavaScript program to read six numbers and display largest among them

```
<html>

<body>

<p>

The biggest number is in list </p>

<p id= "demo"></p>

<script>

document.getElementById("demo").innerHTML=Math.max(5,8,9,7,3,10)

</script>

</body>

</html>
```

Output

The biggest number is

10
